Subject: DOCKET NO. SDWA-10-2013-0080 / Groundwater Monitoring Well Installation Activities - Monday, July 15, 2013 Update
Date: Monday, July 15, 2013 7:22:59 PM

Rene,

Today, Monday, July 15, 2013, Cascade drilled YVD-13 to a total depth of 148 feet. The general lithology consisted of sand & gravel to 20 feet, silt to about 40 feet, and fine sand to 148 feet. An obvious WBZ was not encountered, although water was found in the casing when allowed to stabilize for 30 minutes. Cascade tripped out the drilling rods and secured the boring for the evening. The water level will be allowed to stabilize overnight and gauged Tuesday morning, prior to resuming monitoring well installation activities.

Let me know if you have any questions.

Thank you,

Tom
